🌐 <https://github.com/psycho-70>

Highly skilled and dedicated Web Developer with comprehensive experience in both front-end and back-end development. Proficient in crafting dynamic and responsive web applications. My expertise spans from designing visually appealing interfaces to developing robust back-end architectures, ensuring a cohesive and high-performing product.

PROJECTS

Information World

- Technologies: Next.js, MongoDB
- A comprehensive website featuring multiple pages (home, notes, login, contact, blog) that includes a login system with Google and GitHub OAuth, and stores user login information in a MongoDB database. Implemented NextAuth for authentication and utilized MongoDB to manage user data.

Password Manager

- Technologies: MERN (MongoDB, Express.js, React.js, Node.js)
- Created a secure password manager application that enables users to store and manage their passwords securely. Implemented encryption for data security and user authentication for access control.

Additional Projects

- Developed several other web applications and websites, demonstrating versatility and adaptability in using different technologies and frameworks.

Education

FSc in ICS

2017 - 2019

- Wisdom College

Bachelor of Software Engineering

2019 - 2023

- Kohat University of Science and Technology
